TABULA
liberate data tables trapped inside PDFs

Extracting Data from PDF File with Tabula

Tabula

Tabula is a tool for liberating data tables locked inside PDF files.

We'd love to hear from you! Say hi on Twitter at [@TabulaPDF](#)

Latest Version: Tabula 1.2.1

June 4, 2018

Tabula 1.2.1 fixes several bugs in the user interface and processing backend. (You can read about all the changes [in the release notes](#).)

Download Tabula below, or [on the release notes page](#).

Special thanks to our [OpenCollective backers](#) for supporting our work on Tabula; if you find Tabula useful in your work, please consider a [one-time or monthly donation](#).

How Can Tabula Help Me?

If you've ever tried to do anything with data provided to you in PDFs, you know how painful it is — there's no easy way to copy-and-paste rows of data out of PDF files. Tabula allows you to extract that data into a CSV or Microsoft Excel spreadsheet using a simple, easy-to-use interface. Tabula works on Mac, Windows and Linux.

Who Uses Tabula?

Tabula is used to power investigative reporting at news organizations of all sizes, including [ProPublica](#), [The Times of London](#), [Foreign Policy](#), [La Nación \(Argentina\)](#), [The New York Times](#) and the St. Paul (MN) Pioneer Press.

Grassroots organizations like [SchoolCuts.org](#) rely on Tabula to turn clunky documents into human-friendly public resources.

Is the extracted data incorrect?

You can revise your selected cells or try an alternate extraction method.

Revise Selected Cells

Data has been extracted from the cells you selected in the previous step. You can revise your selection(s) to add or remove cells.

[← Revise selection\(s\)](#)

Choose Alternate Extraction Method

The current preview uses the **Stream** extraction method. If the data is not mapped to the correct cells, try the **Lattice** method instead.

[Stream](#)[Lattice](#)

Stream looks for *whitespace* between columns, while Lattice looks for *boundary lines* between columns.

The screenshot shows a Notion dashboard titled "COVID19-18-Districts". The main area displays a grid view of COVID-19 cases, categorized by district and building. A modal window titled "Paste Table Data" is open, prompting the user to copy data from a spreadsheet. To the right, a pivot table provides a summary of cases by district.

The screenshot shows a Notion dashboard titled "COVID19-18-Districts". On the left, there is a table titled "COVID19-18District Counts" with 18 rows of data. The first row, "A District", has a red box around its edit modal, which is titled "Counts" and contains a "Single line text" input field with placeholder text "Enter default text". The table data is as follows:

	District	Count
1	九龍城	
2	元朗	
3	北區	
4	南區	
5	大埔	
6	屯門	
7	東區	
8	沙田	
9	油尖旺	22
10	深水埗	2
11	灣仔	28
12	荃灣	7
13	葵青	13
14	西貢	16
15	觀塘	13
16	離島	12
17	黃大仙	4
18	中西區	39

On the right, there is a "BLOCKS" panel with a "Dashboard 1" card containing a "Pivot table" section. The pivot table shows the following data:

District	Count
西貢	16
觀塘	13
離島	12
黃大仙	4
Total	262

There are also "Install a block" buttons at the top and bottom of the dashboard card.

Central and Western District

From Wikipedia, the free encyclopedia

Coordinates:  22°17'12"N 114°09'18"E

Not to be confused with West Central District of Tainan, also named 中西區 in Chinese.

The **Central and Western District** (Chinese: 中西區; Cantonese Yale: Jūngsāi Kēui) located on northwestern part of [Hong Kong Island](#) is one of the [18 administrative districts of Hong Kong](#). It had a population of 243 266 in 2016. The district has the most educated residents with the second highest income and the third lowest population due to its relatively small size.

Central is the central business district and the core urban area of Hong Kong. Western District covers Shek Tong Tsui, Kennedy Town, Sai Ying Pun, parts of Lung Fu Shan. The district was part of City of Victoria, the earliest urban settlement in colonial Hong Kong.

Community Isolation Support Database - for Covid-19 response

#COMMUNITY MOBILIZATION #HEALTH AND SELF-IMPROVEMENT
#NONPROFITS AND VOLUNTEERING

Hi, my name is Kay Peacey.

I am in Cornwall in the UK, and we have just spent the last couple of days sort of scrambling, to get a community support group in place, to support people who are isolated, or who are vulnerable, and who need help right now to deal with what's

The screenshot shows a Tableau desktop interface. On the left, there's a sidebar with 'Dimensions' (District, Measure Names) and 'Measures' (Counts, Lat, Lng, Number of Records, Measure Values). The main workspace displays a dashboard titled '18 Districts COVID19' with a value of 262. The dashboard includes a 'Marks' card set to 'Text' with the formula 'SUM(Counts)'. A large orange box highlights the 'Text' mark type icon. To the right is a 'Show Me' sidebar containing various visualization icons, with a specific chart type highlighted by an orange border.

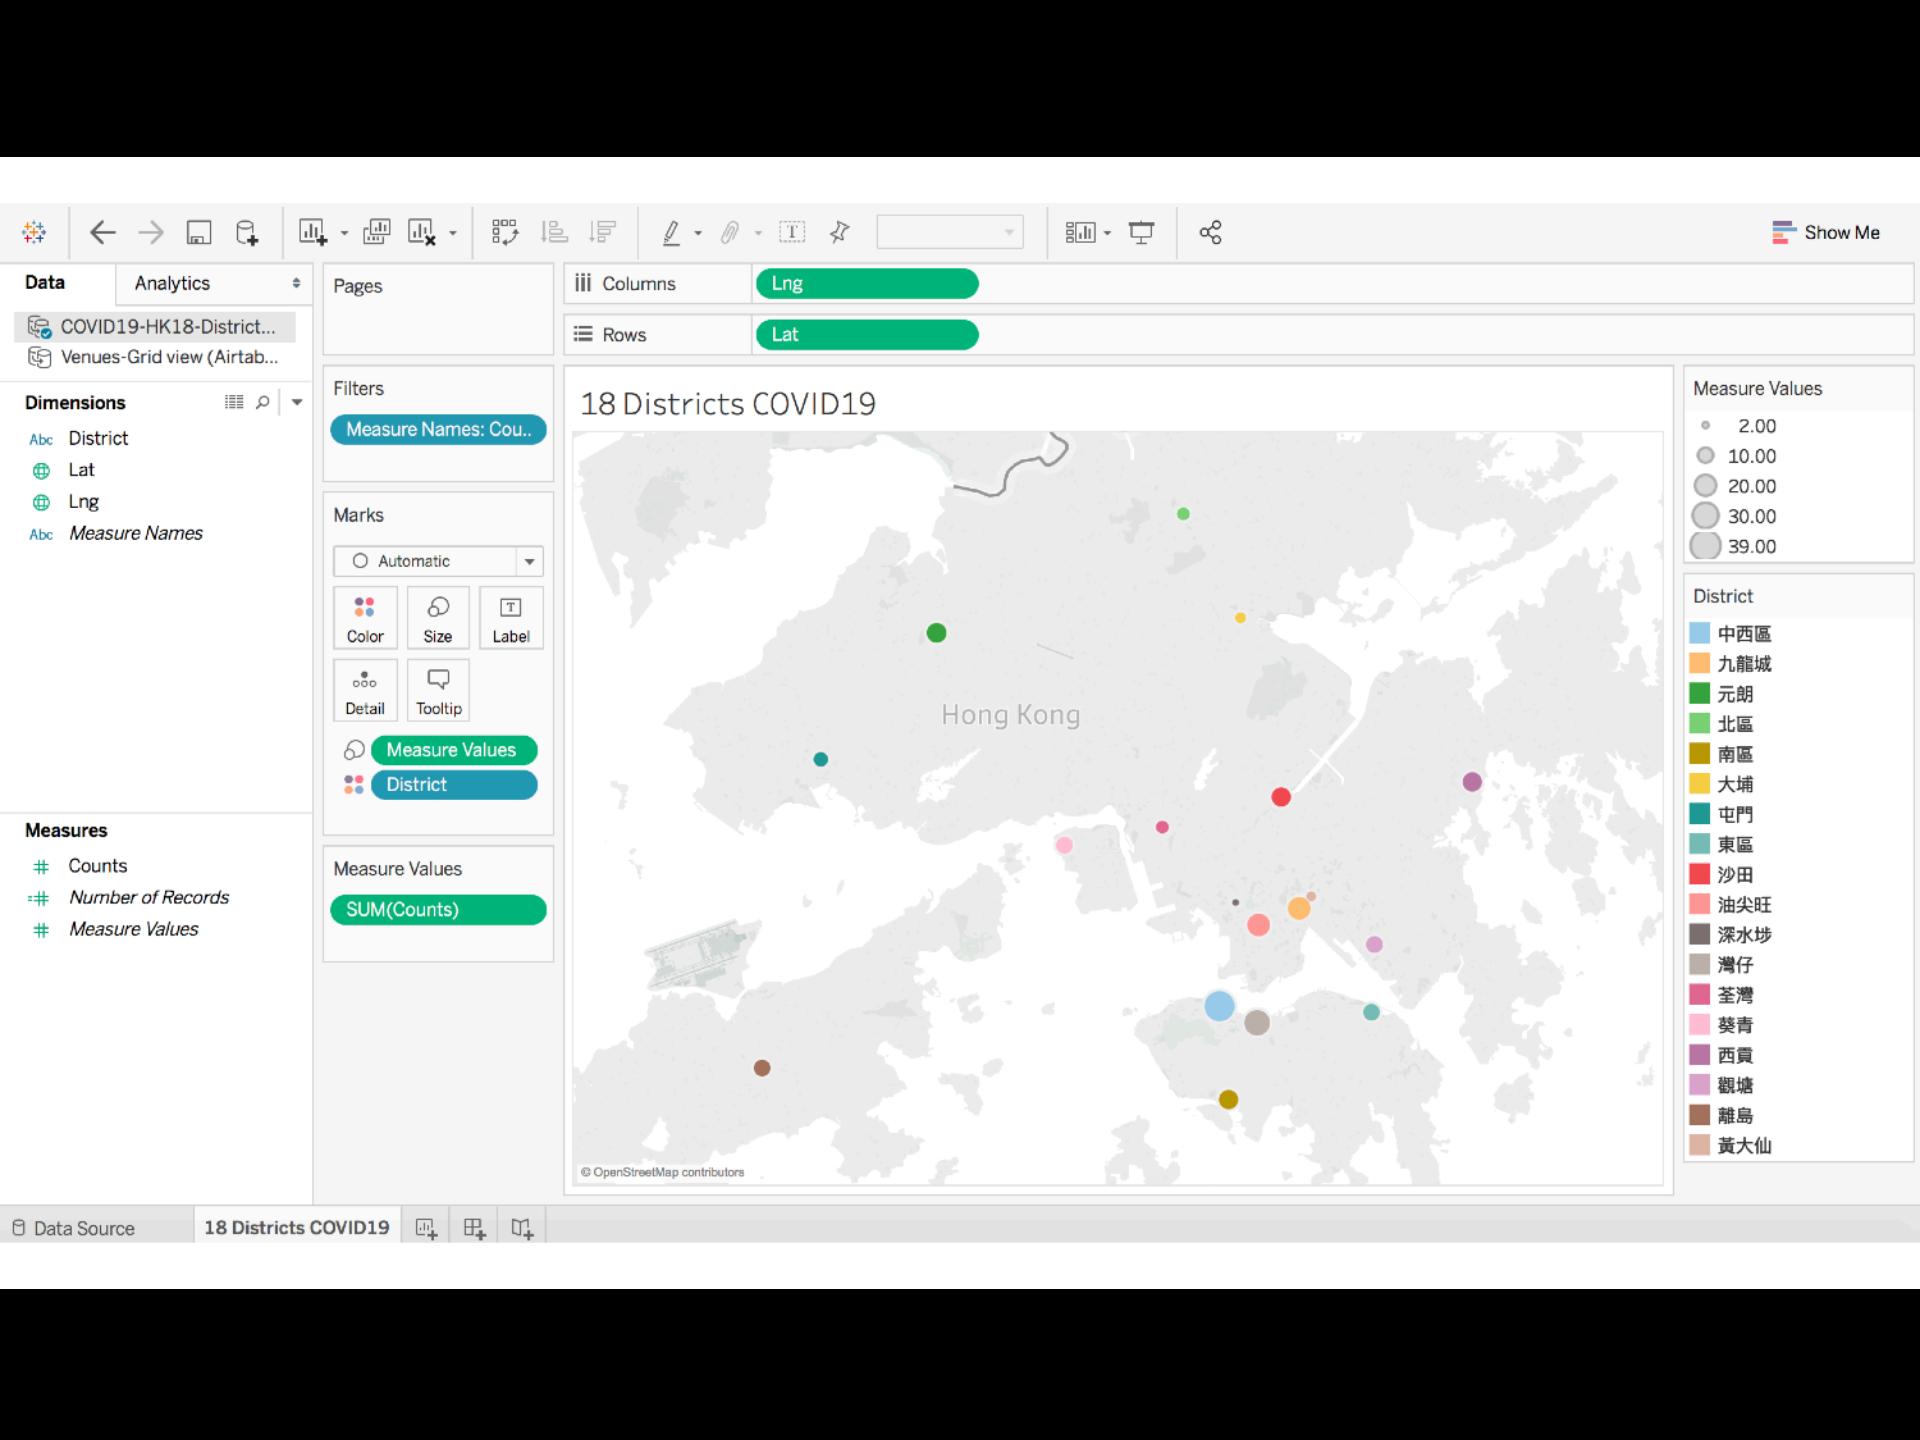

The screenshot shows the Tableau desktop interface with a dashboard titled "18 Districts COVID19". The dashboard displays a single horizontal bar chart with the value "262" labeled below it. The interface includes a top navigation bar with various icons, a left sidebar for "Data" and "Dimensions" (listing "District", "Lat", "Lng", and "Measure Names"), and a bottom navigation bar with tabs for "Data Source" and "18 Districts COVID19". A large preview area on the right shows a grid of 18 colored bars corresponding to the districts. A callout box highlights the horizontal bar chart with the text "For horizontal bars try 0 or more Dimensions 1 or more Measures".

This section displays four thumbnail images of Hong Kong scenes: Kowloon City, Yuen Long, North District, and South District. Each thumbnail has a corresponding label below it. A filter and sort menu is at the top left, and a search bar is at the top right. There are also info and edit icons on the far left and right respectively.
